

# QUICK RELEASE COUPLINGS

For fast and easy connections of hydraulic hoses, the Alfagomma range of fluid components includes the ARGUS series of quick disconnect couplings, with products complying to international standards ISO 7241-1 A & B, ISO 5675 and ISO 16028, having poppet and flat face valve respectively.

The standardised design assures the complete interchangeability with corresponding couplings currently in use.

Made from high strength carbon steel as the basic material, hardened in parts subject to wear, ARGUS couplings feature a chrome-III zinc plating with a long lasting resistance to oxidation (TOP COAT, patented).

The mechanical and fluid dynamic performance are maximised by means of specific geometries defined through CFD calculations. Additional extensive testing is carried out after production following the requirements of ISO 7241-2 standard.

ISO-A range includes the true general purpose quick release couplings, with sizes from 1/4" to 1 1/2", BSPP, NPTF and metric threaded connections, and working pressure up to 350 bar. Agricultural machinery is the main application for ISO-A couplings. ISO 7241-1 B series is more employed in the industrial sector (pressures can reach 400 bar), for equipment powered and controlled by hydraulic systems.

The flat faced range is the optimal choice to avoid circuit contamination and oil leakage when connecting and disconnecting.

Flat faced couplings are widely used on construction equipment, but also in hostile environments where spillage can constitute a danger.

They have sizes from 1/4" to 1", constant working pressure of 350 bar and minimised flow losses.

Screw quick couplings are also included in the ARGUS family. Connection under residual pressure is made possible by specific couplings with poppet or flat face valve. Further sizes and types, including customised multi-coupling systems, are available on request.

## ARGUS TAILOR MADE

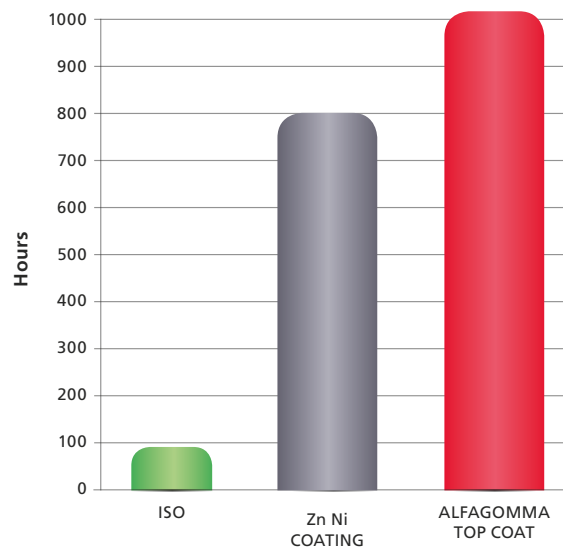

ARGUS can develop every kind of quick release and multi-coupling system according to customer's needs or specifications.

## STRONGER THAN EVER

Thanks to the exclusive Alfacomma **TOP COAT** – Galvanic Coating – proprietary technology, the complete range of ARGUS quick release couplings can boast an extraordinary wear and corrosion resistance, so as to guarantee a longer lifespan to your system.

Alfacomma **TOP COAT** is based on a system of trivalent passivation which reaches outstanding rusting and corrosion resistance levels. Tested in accordance with ASTM B117-03 and UNI ISO 9227 standards, Alfacomma **TOP COAT** ensures over 1000 hours to red rust.

### RESISTANCE TO RED RUST IN SALT FOG (test in compliance with ISO 9227)

DN 6 to 51  
to max. WP 350 bar

- Quick and simple coupling and uncoupling
- Cost effective

**ARGUS ISO 7241-1 series “A” quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated.

The SVK-ISO-A quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve.

This guarantees a flush connection between the two coupling halves.

#### Materials

Galvanised steel with hardened parts subject to wear – NBR O-rings (other materials optional) – Polyethylene dust cap and dust plug.

Cr-III zinc plating through additional passivation for improved surface protection (TOP COAT for metric version).

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

#### Temperature range:

from -20 °C to +100 °C.

from -30 °C to +125 °C (metric version).

Specific instructions for installation, use and maintenance are separately provided.

Rated flow / pressure drop compliant with ISO 7241-1 standard.

**STANDARD ISO 7241 A - Poppet SVK-ISO-A**
**Female coupling - female thread**

- Quick and simple coupling and uncoupling
- Stainless steel AISI 316

**ARGUS ISO 7241-1 series “A” quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated.

The SVK-ISO-A SS quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve. This guarantees a flush connection between the two coupling halves.

#### **Materials**

Stainless steel AISI 316 – FKM O-rings (other materials optional) – Polyethylene dust cap and dust plug.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2, water or other aggressive fluids.

Resistant to outdoor and harsh environments.

#### **Temperature range:**

from -20 °C to +100 °C.

Specific instructions for installation, use and maintenance are separately provided.

Rated flow / pressure drop compliant with ISO 7241-1 standard.

**STANDARD ISO 7241 A - Poppet SVK-ISO-A SS**
**Female coupling - female thread**

- Quick and simple coupling and uncoupling

**ARGUS ISO 7241-1 series “B” quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated.

The SVK-ISO-B quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve.

This guarantees a flush connection between the two coupling halves.

#### Materials

Galvanised steel with hardened parts subject to wear – NBR O-rings (other materials optional) – Polyethylene dust cap and dust plug.

Cr-III zinc plating through additional passivation for improved surface protection.

Also available in stainless steel.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

#### Temperature range:

from -20 °C to +100 °C.

Specific instructions for installation, use and maintenance are separately provided.

Rated flow / pressure drop compliant with ISO 7241-1 standard.

- Ball valve
- Agricultural/normal series
- Compatibility with other couplings in-use
- DN 12 compatible with ISO 7241-1-A

**ARGUS Agricultural/Normal quick release couplings with ball valve** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SNK-B quick release coupling, formed by the coupling plug and the coupling socket, is connected by pushing on a sleeve.

#### Materials

Galvanised steel with hardened parts subject to wear – NBR O-rings (other materials optional) – Polyethylene dust cap and dust plug.

Cr-III zinc plating through additional passivation for improved surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

#### Temperature range:

from -20 °C to +100 °C.

Specific instructions for installation, use and maintenance are separately provided.

**INDUSTRY STANDARD - Poppet SNKB**
**Female coupling - female thread**

- Quick and simple coupling and uncoupling
- One-hand push-pull operation
- Break-away function
- Low pressure drop

**TOP COAT**

**ARGUS SVK-1H-ISO-A quick release couplings** are used for quick coupling and uncoupling of loaded lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated.

The SVK-1H-ISO-A quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. SVK-1H-ISO-A quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

**Materials**

Galvanised steel with hardened parts subject to wear – HNBR O-rings (other materials optional) – Galvanised steel threaded adapters for various connection types – Polyethylene dust cap and dust plug (see SVK-ISO-A). TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:**  
from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

Flow rate (l/min)

DN 8 to 19  
to max. WP 400 bar  
SAE J 1036

- Quick and simple coupling and uncoupling
- One-hand push pull operation
- Break-away function
- Low pressure drop
- DN 12 compatible with ISO 7241-1-A

**TOP COAT**

**ARGUS SVK-1H quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The SVK-1H quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. SVK-1H quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

**Materials**

Galvanised steel with hardened parts subject to wear – Brass valve stem guide – TPE poppet valve seal (PTFE optional) – HNBR O-rings (other materials optional) – Galvanised steel threaded adapters for various connection types – Polyethylene dust cap and dust plug. TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:** from -30 °C to +100 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

- Break-away function
- One-hand push pull operation
- Low pressure drop

**ARGUS PVK-Racing quick release couplings** are used for quick coupling and uncoupling of fluid lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The PVK-Racing quick release coupling, formed by the coupling plug and the coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed so that it has only to be moved in the relevant direction for disconnecting or connecting of coupling halves. PVK-Racing quick release couplings can be used as pull-off couplings by panel mounting the sleeve bush.

#### Materials

Aluminium – Brass valve stem guide – TPE poppet valve seal (PTFE optional) – NBR O-rings (other materials optional) – Polyethylene dust cap and dust plug.

**Temperature range:**  
from -30 °C to +100 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

- Connectable with male part under pressure
- One-hand push pull operation
- Break-away function
- Low pressure drop
- Compatible with ISO 7241-1-A

**TOP COAT**

**Connectable under pressure ARGUS SPK-1H quick release couplings** are not only for coupling to hydraulic auxiliary equipment under residual pressure, but they also prevent from unintentional closing through the intervening backflow effect (i.e. through quickly reducing loads).

The double valve stroke required for the coupling to a pressurized plug is limited in the operating condition by a lock, which is not disengaged until decoupling occurs.

This prevents any uncontrolled blocking of the hydraulic flow.

Rated flow / pressure drop values on request.

**The sleeve must be relieved during the coupling action.**

The pressurized cartridge valve is opened by applying pressure on the socket side.

**Materials**, flow losses and temperatures are comparable to ARGUS SVK-1H quick release couplings. The two couplings can be interchanged, coupled and used as a pull-off coupling. For use with SVK-ISO-A or SVK-1H coupling plugs.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

- To easily adapt flat face to ISO A couplings

**Patent Pending**

**TOP COAT**

**ARGUS Quick Release Adapters** provide an easy and reliable connection between female poppet ISO 7241 A and male flat face ISO 16028 couplings, or between female flat face ISO 16028 and male poppet ISO 7241 A couplings. This allows the user to adapt an already existing quick release part to a new type of connection.

#### **Materials**

Housing and valves galvanised steel with hardened parts subject to wear.

Seals HNBR (other materials on request) – backup rings PTFE – Polyethylene dust cap and dust plug.

TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for fluid lines with mineral oil based hydraulic fluids according DIN 51524 T1 + T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

#### **Temperature range:**

from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

- Flow performance optimized by CFD
- Low leak-oil rates, eco-friendly
- Robust, compact and lightweight
- Extended temperature range

**Patent Pending**

**TOP COAT**

**ARGUS flat face quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated. The FPK flat face quick release coupling, formed by a coupling plug and a coupling socket, is coupled by pushing on a sleeve. This guarantees a flush connection between the two coupling halves. The sleeve is designed to be moved in the relevant direction for disconnecting or connecting the coupling halves. A safety system against accidental uncoupling is present on the female part.

**Materials**

Galvanised steel with hardened parts subject to wear.  
HNBR seals (other materials on request) – backup rings PTFE – Polyethylene dust cap and dust plug.  
TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for fluid lines with mineral oil based hydraulic fluids according DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:**  
from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**  
Specific instructions for installation, use and maintenance are separately provided.

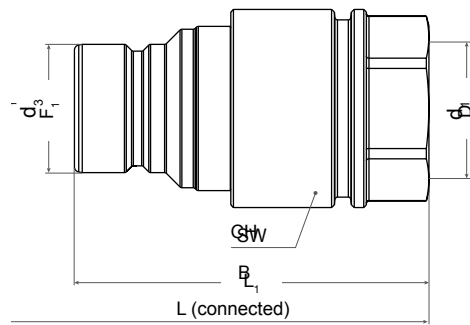

Values obtained with the same nominal size of coupling and connection (e.g. coupling 1/2", connection BSP 1/2").  
For the evaluation of the actual pressure drops and for the comparison among different quick couplings, it is strictly needed to be aware of the test conditions those values have been determined at.

- Connectable under pressure with patented system
- Low effort to connect under pressure
- Robust, compact and lightweight
- Low leak-oil rates, eco-friendly
- Low pressure drop

**Patent Pending**

**TOP COAT**

**Connectable under pressure ARGUS FPK-P flat face quick release couplings** are used for quick coupling and uncoupling of hydraulic lines. During the coupling action in zero or low-pressure ranges, valves that release or block the flow are automatically activated.

The FPP flat face quick release coupling, formed by a coupling plug and a coupling socket, is coupled by pushing on a sleeve.

This guarantees a flush connection between the two coupling halves.

The sleeve is designed to be moved in the relevant direction for disconnecting or connecting the coupling halves.

Rated flow / pressure drop values on request.

#### Materials

Galvanised steel with hardened parts subject to wear.  
HNBR seals (other materials on request) – backup rings PTFE – Polyethylene dust cap and dust plug.

TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for fluid lines with mineral oil based hydraulic fluids according DIN 51524 T1+T2. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range** from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

DN 8 to 32  
to max. WP 450 bar

- For high pressure load
- Robust construction
- Excellent flow rate
- Can be coupled at up to 50 bar
- German standard

**TOP COAT**

**ARGUS HDK high pressure couplings** can be used for connecting and disconnecting hydraulic lines. Their robust construction and tested components make them ideally suited for **high and intermittent pressure loads**. During the coupling action, valves that release and/or block the flow are automatically activated. The HDK quick release coupling, formed by coupling plug and coupling socket, is coupled by a screwing action with the hand nut of the plug component. **Can be coupled to a max. of 50 bar residual pressure.**

**Materials**

Galvanised steel – Brass valve stem guide – TPE poppet valve seal (PTFE optional) – HNBR O-rings (other materials optional) – Stainless steel compression spring.  
TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.  
**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.  
**Temperature range:**  
from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.** Specific instructions for installation, use and maintenance are separately provided.

1228895	RT-P600010	-20	32	1 1/4	80

DN 10 to 25  
to max. WP 315 bar

- Low leak-oil rates, eco-friendly
- Robust construction
- Low pressure drop
- Can be coupled by hand at up to 20 bar

**TOP COAT**

**ARGUS RK pipe couplings** enable oil leak-free connection and disconnection of hydraulic lines. The coupling consists of one fixed and one loose half. The two halves are coupled by a screwing action with hand nuts and/or hand wheel. During this process, valves in the two halves open against spring force. During decoupling, these valves close before the coupling halves separate. This prevents air intake into the lines, eliminating the need of secondary venting. Coupling can be carried out by hand **while pressurised** at up to approx. 20 bar, or by means of tools under higher pressures. In the uncoupled status, the coupling halves are protected from contamination and damage with the components indicated as accessories.

**Materials**

Galvanised steel **housing and internal components** – Brass vent sleeve in the loose half – all seals HNBR (FPM seals optional). TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:**

from -30 °C to +125 °C (and/or with FPM seals up to +200 °C).

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

- Break-away function
- Extremely low leak-oil rates, very eco-friendly
- Low pressure drop
- Can be coupled by hand at up to 20 bar

**TOP COAT**

**ARGUS AK break-away couplings** enable a leak-oil free connection or disconnection of hydraulic lines. The coupling consists of one fixed and one loose half. The two halves are coupled by a screwing action with hand nut and/or hand wheel. During this process, valves in the two halves open against spring force. During decoupling, these valves close before the coupling halves separate. This prevents air intake into the lines, eliminating the need of secondary venting. Coupling can be carried out by hand **while pressurised** at up to approx. 20 bar, or by means of tools under higher pressures. The coupling halves can also be pulled apart. This possibility prevents the pipeline system bursting under tensile load and thereby the medium escaping.

During the pull-off stroke, the fixed half must be connected to a hose assembly or a spring-mounted pipe. In the uncoupled status, the coupling halves are protected from contamination and damage with the components indicated under Accessories.

**Materials**

Galvanised steel housing and internal parts – Brass vent bush in the loose half – Steel DN 6 to 10 pull-off housing, from DN 12 (13) malleable iron – all seals NBR (FPM optional). TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatic and water hydraulics in appropriate materials on request.

**Temperature range:** from -30 °C to +100 °C

**Other sizes and connection types available on request.**

Specific instructions for installation, use and maintenance are separately provided.

**SCREW COUPLING - Flat face AK**
**Female coupling (fixed part) - metric 24° light/heavy series**

**TOP COAT**

**ARGUS PTK high pressure couplings** can be used for connecting and disconnecting hydraulic lines. Their robust construction and tested components make them ideally suited for high and intermittent pressure loads. During the coupling action, valves that release and/or block the flow are automatically activated. The PTK quick release coupling, formed by coupling plug and coupling socket, is coupled by a screwing action with the hand nut of the plug component.

Rated flow / pressure drop values on request.

**Materials**

Galvanised steel HNBR O-rings (other materials optional).  
TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 T1+T2.

**Temperature range:**  
from -30 °C to +125 °C.

**Additionally to the connection threads shown in the following tables, further types and sizes are available on request.**

Specific instructions for installation, use and maintenance are separately provided.

**Patent Pending**

**TOP COAT**

**ARGUS multi-couplings**, which consist of a fixed and a mobile part, are developed following the specific needs of the user.

The multi-connection plates are obtained from an anodized aluminium block as standard, and include the locations for flat-face couplings built of carbon steel with TOP COAT surface protection, but every component can be manufactured in different materials on request. The number of lines and possible electric or pneumatic connections can be defined depending on the application requirements.

Connecting and disconnecting are carried out by means of a cam-leverage group with guiding pins, and a safety device is always present. Hose connections can be executed with threads of every type (e.g. BSP, NPT, SAE, metric) or also with the quick connect system "Plug-In Connector".

A complete range of spare parts and accessories are available. Specific instructions for installation, use and maintenance are separately provided.

- Low pressure drop

**TOP COAT**

Non return valves enable a flow in one direction and block it in the opposite direction. They therefore belong to the group of check valves (DIN 24300).

**ARGUS non return valves** guarantee an extremely low-resistant flow through their streamlined internal parts.

The valves are sealed by spring-hydraulic poppets and washer. Stroke limitation ensures free outlet opening. Depending on opening pressure, they can also be used as a suction and safety valve.

**Materials**

Galvanized steel housing and poppet valve – Brass housing also available – Brass valve stem guide – TPE seals (PTFE optional). TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:** from -30 °C to +125 °C.

**Opening pressure:** 0.5, 2 or 4 bar; other opening pressures available on request.

**Viscosity range:** to 400 cSt (53 °E).

Specific instructions for installation, use and maintenance are separately provided.

**ARGUS PRV cartridge non return valves**

are designed for direct installation into device or machine housings. They enable a flow in one direction and block it in the opposite direction. They therefore belong to the group of check valves (DIN 24300).

ARGUS PRV cartridge non return valves ensure particularly low-resistance flow through their streamlined internal parts.

The valves are sealed by spring-loaded poppets and washer. Stroke limitation ensures free outlet opening.

Depending on opening pressure, they can also be used as suction and safety valves.

**Materials**

Gunmetal housing, galvanized steel valve – Brass valve stem guide – Steel spring compression spring – TPE seals (PTFE optional). Cr-III zinc plating through additional passivation for improved surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

**Temperature range:** from -30 °C to +100 °C.

**Opening pressure:** 0.5 bar; other opening pressures available on request.

**Viscosity range:** to 400 cSt (53 °E).

Specific instructions for installation, use and maintenance are separately provided.

**SPECIAL ITEMS**

Customised versions of cartridge non return valves. ARGUS can develop check valves according to customer's needs or specifications.

**MIL Standard**

DN 6 to 16  
to max. WP 400 bar

- One-piece housing
- Low pressure drop

**TOP COAT**

**ARGUS LBS excess flow check valves** are installed in systems to prevent the medium escaping through line breaks.

Under normal operation, they are open and installed near to a tank or cylinder to be protected. They close if excess flow speeds occur.

Each excess flow check valve is rated for maximum flow speed.

The excess flow check valve is held in the OPEN position by a compression spring.

If the spring pre-tension is exceeded, the poppet valve moves in the valve seat and closes the line. Outside influences, e.g. sudden movements, impact on moving devices, installed position, can create axial forces and thereby changes in the closing volume.

If the user is unable to prevent from such influences, system tests must be run.

The excess flow check valve has to be installed as close as possible to the component to be protected (tank or cylinder), whereby high flow resistances between the element to be protected and the excess flow check valve are to be prevented.

#### Material

Galvanized steel housing and poppet valve – Brass valve stem guide – Steel spring compression spring. TOP COAT Cr-III zinc plating with additional trivalent passivation for outstanding surface protection.

**Suitable** for liquid lines with mineral oil-based hydraulic fluids to DIN 51524 and DIN 51525. Also available for flame-resistant hydraulic fluids to VDMA 24317, for pneumatics and water hydraulics in appropriate materials on request.

#### Temperature range:

from -30 °C to +125 °C

#### Closing volume l/min:

at 35 cSt (4.7°E) max.  $a \leq 1 \text{ m/s}^2$  (ref. table)

#### Viscosity range:

to 400 cSt (53 °E)

Other closing volumes and connection types on request.

Specific instructions for installation, use and maintenance are separately provided.

- Extremely low torque for rotation under pressure
- Robust, compact and lightweight
- Outstanding wear resistance
- Long-lasting service life

**Patent Pending****TOP COAT**

**ALFAGOMMA** state-of-the-art **Swivel Connector** range is specifically designed to withstand the most severe working conditions and to ensure the best performances in the harshest environments up to 410 bar operating pressure. Its innovative ball bearing-less swivel system guarantees long lasting reliability to the hydraulic system, increasing productivity without fluid leakages.

The ball bearing-less inner mechanism ensures a consistent rotary movement within the system and prevents damaging torsions to the hose. The result is an increase in components service life and lower operating costs due to easier & inexpensive maintenance.

Alfagomma Swivel Connectors have a compact design, which makes them suitable for use in the smallest of spaces. Thanks to our exclusive TOP COAT – Galvanic Coating – proprietary technology, the complete range of Alfagomma swivel connectors can boast an outstanding wear and corrosion resistance, so as to guarantee a longer lifespan to your hydraulic system.

**Materials**

High strength carbon steel with TOP COAT surface protection. HNBR and PTFE seals and bushings.

**Working Pressure**
