// FLEXOR RIG™ – OIL WELL CEMENTING

API-7K SPEC. - FSL0 TRange III

Tube: oil and drilling mud resistant synthetic rubber.

Reinforcement: six high tensile steel spirals.

Cover: special "supertuff" cover for excellent abrasion resistance and long service life in heavy duty application.

Application: high pressure cement slurry transfer between pump manifold and cementing head.

Constant operation: -20°C +121°C (-4°F +250°F)

Safety factor: 2,25:1

Length: 61 m (200 ft) max

Note: Fully API 7K approved when supplied with Alfagomma Integral 2" 1502 Hammer Union couplings.
